

What is the Towards Maturity Index?

Your TM index is
49.20

Over 1800 organisations have participated in the Towards Maturity Benchmark since 2003. Over the years we have consistently found that organisations mature in their use of learning technologies report more staff impact, more business impact, more take up and more efficiency.

Towards Maturity have identified 6 work streams of implementation practice (the [Towards Maturity Model](#)) that increase with maturity and consistently correlate to success in the workplace.

In 2010, this model was used to develop the ***Towards Maturity Index***, a composite index measure on a scale of 1 to 100. The TMI provides organisations with a single measure of implementation maturity against this model.
